

To whom it may concern, I have just read an article on How the NAB is trying to push the Limits of what XMSR can broadcast. this is unbelievable! instead of raising their standards and try to compete with something they see as a major threat to their "unwanted "market share the NAB is trying to lower XMSR's standards down to their level where the NAB doesn't have to improve their service. I have been an xm radio listener now going on 2 1/2 yrs that is by MY choice not the government or the guy next door!

I still have a radio in my House & Car This gives me the opportunity to listen to either xm radio local broadcasts or nothing This is either my choice to what I listen too and none else's

Let's compare this to television i have the choice of channel hopping form station to station or turning the darn thing off This is what made America such a great Country !

FREEDOM of choice.

And I can tell you I don't listen to either 100% of the time.

I listen to fox & cnn Radio just as I watch those channels on T.V.

Has the Nab offered that to me on the am or fm frequencies no.

If you try to take away XMSR's right to broadcast local information.

you might as well throw or beloved constitution out the door ,and declare this country is now under dictatorship of the FCC.

I think I have expressed my opinion and feelings on this well enough.

Please leave free speech alone. as well as free enterprise.

Thank you for your time and concern on this matter

Yours in Radio listening.

Keith Clark,

Retired business Person.
